

RED STRAP FLOWER

紅繼木

Botanical Name:

Loropetalum chinense f. rubrum

Family | Genus:

Hamamelidaceae | Loropetalum

Location in TSM:

Contentment Garden,
Vista Terrace,
Mindful Path

The leaves, flowers, and roots are all used in traditional Chinese medicine. White Strap Flower is uncommon in Hong Kong, Red Strap Flower is a breed created from artificial cultivation. It is often used in gardening and landscaping due to its strong resistance to pests and diseases.

“The flocks of birds have
fondest place to rest while
I love my cosy house the
best.”

「眾鳥欣有托，
吾亦愛吾廬。」

Tao Yuanming,
“Reading The Classic of Mountains and Seas”
陶淵明 《讀山海經》
