

SPIDER TREE

樹頭菜

Botanical Name:
Crateva unilocularis
Buch.-Ham.

Family | Genus:
Capparidaceae | *Crateva*

Location in TSM:
Contentment Garden

According to *Flora of China*, in Shiping and Jianshui of Yunnan, the locals pickle the young leaves with salt and store them as food. Its wood can be used to make plates, musical instruments, and models. The peel can be used as a dye. The leaves and stems can detoxify and strengthen the stomach. The roots and bark can relieve pain, remove dampness, and activate the collaterals.
